

QUEENSLAND COMMUNITY RENEWABLES FORUM

FORUM ROMA - TUESDAY 1 APRIL 2025

Exhibitor opportunity

Queensland aims to be a leader in the responsible development of sustainable, reliable and cost-effective energy as part of the transition to renewables.

The next Queensland Community Renewables Forum will be held in Roma, where communities, industry and government are coming together to have conversations about what this nation-building energy transition means for the local area.

The Queensland Community Renewables Forum provide an opportunity for a shared understanding of the decades-long benefits ahead for communities as well as the ways in which impacts will be managed.

The Roma event will comprise displays from local renewable energy developers and presentations from a range of speakers from the energy, agriculture, academic and government sectors.

QUEENSLAND COMMUNITY RENEWABLES FORUM

FORUM ROMA - TUESDAY 1 APRIL 2025

Exhibitor Info

Thank you for your interest in being part of the third Queensland Community Renewables Forum, in Roma on 1 April.

The Forum aims to strengthen support for the renewable energy industry by promoting balanced information sharing and fostering direct engagement with regional communities. Our collaboration with Coexistence Queensland, with the assistance of a grant from the Queensland Government, highlights the importance of working together across various sectors, including local governments, agriculture, resources, and conservation.

We welcome all renewable energy developers with interests in the Maranoa Region and surrounding areas to participate in the Forum as an exhibitor.

EVENT FORMAT

The forum will consist of two parts:

Exhibition: A booth-style setup for developers to engage face-to-face with community members, landholders, local businesses, and industry stakeholders. Exhibitors are expected to be ready and willing for one-on-one conversations with attendees.

Guest Speaker Forum: Focused on the key aspects of renewable energy development— the Why, What, and How of large-scale development. The Event Program will be announced in the coming weeks with details of guest speakers and topics.
